

ELC Laser Group

Established in 1989 ELC Laser is an international group with manufacturing facilities in the United Kingdom, Ireland and the Czech Republic.

Specialists in innovation, ELC Laser design and manufacture quality assured products including lifts, architectural steel and traffic control products at very competitive rates. Unrivalled engineering experience and a willingness to take an open approach to customer requirements ensures guaranteed delivery on time, every time.

Investment in leading edge technology and the successful development 2, 3 and 5 – axis laser processing positions ELC as Europe's leading manufacturers of quality three – dimensional products offering previously unavailable design options ideally suited to non standard commissions.

*We now offer a new alternative to traditional lifts for members of the Self Storage Association. The Mast Lift is exclusively available from ELC Laser Group. Superbly designed this robust, bespoke product requires minimal installation time and is fully compliant with EU legislation. This product is offered as a turnkey service with all site inspections, safety training and certification applications undertaken by our team of experts. **This month we have a special offer on stainless steel and personal parking bollards available to SSAUK members.***
